General Information

The CORE PIR sandwich panel consists of two galvanised steel sheets as the outer and inner lining of the panel and a PIR foam core, which is also the load-bearing and insulating layer. Double-sided galvanised steel sheet type S280GD or S320GD and zinc weight Z100 g/m2 for indoor use only and Z225 g/m2 or Z275 g/m2 for indoor and outdoor use. As a standard, the sheet is coated with a 25 µm polyester coating. On special request, it can be coated with HDP35 or HDX55. The sandwich panel cladding is finished with a special film, which is designed to protect sandwich panels during transport, loading and unloading and during their storage in a warehouse or on the construction site. The core of the panel is rigid polyisocyanurate foam, abbreviated colloquially called PIR foam, which is characterised by increased fire parameters increasing fire safety and excellent thermal and acoustic insulation properties significantly increasing the quality of the constructed of modernised facility. The density of the foam is 40±3 kg/m3

Application

Sandwich panels are a modern product with a very wide range of applications in today's construction industry. They are used to develop both roofs and facades of new buildings as well as modernised ones. They are also used for interior walls and ceilings, ensuring the freedom to arrange interior production, storage or office areas. Due to the excellent thermal conductivity coefficient: λ=0.022 W/mK, it is used, among others, in the construction of cold stores and freezers. Attractive colours and varied profiling allow for the design and construction of public utility facilities. This technology makes it possible develop buildings in a very short time and, in addition, due to its attractive price, allows the use of sandwich panels to be so common on today's developments.

Thermal insulation

According to the current Technical Conditions 2021, newly designed and constructed partitions should meet certain requirements. In the case of external walls, the legislator has classified this according to the temperatures provided for when using the rooms:

– for rooms > 8 °C coefficient UC=0.9 W/m2K

– for rooms between (8 and 16 °C) coefficient UC=0.45 W/m2K

– for rooms ≤ 16 °C coefficient UC=0.2 W/m2K

Acoustic properties

CORE PIR sandwich panels have a minimum insulation factor of ≥ 24 dB (-2, -4), this allows to use sandwich panels as a partition in many facilities, both industrial and public utility, thereby increasing the quality level of the facilities operated in accordance with the applicable standards in this respect.

Fire resistance

CORE PIR sandwich panels have been tested for their fire resistance by the relevant authorised testing bodies. They are NRO approved and have a very good fire resistance and reaction to fire class.

General rules of panel assembly

Before starting the installation of sandwich panels, the following should be checked:

– compatibility of the load-bearing structure of the facility with the design

– whether the surface of the transoms is in one plane

– whether the elements of the load-bearing structure have been adequately protected against corrosion

– linearity and level of the plinth

– whether there is access for delivery trucks and space for manoeuvring the hoists or other devices which will be used for the assembly

– whether tools for the installation of sandwich panels and assembly control have been selected correctly and whether auxiliary tools have been completed

– checking the authorization of workers to perform specific works in this area and whether all workers have up-to-date safety training.

Selection and application of connectors for the assembly of sandwich panels

The choice of fasteners must be in accordance with the designer's recommendations and verified for load-bearing capacity by the constructor; fasteners can be self-drilling or self-tapping but designed for the relevant material from which the load-bearing structure is made. The most common structures are reinforced concrete, steel and timber.

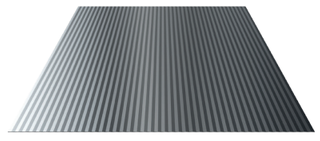
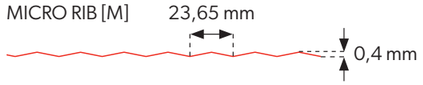
Types of profiling, coatings and colours

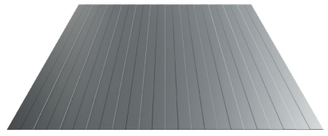
Profiling types of CORE PIR wall sandwich panels

External profiling

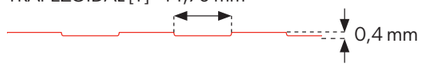


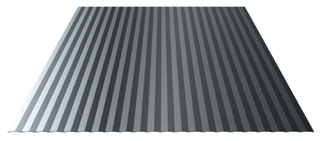
MICRO RIB [M] 23,65 mm



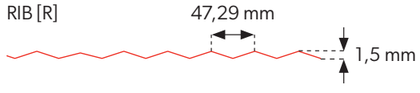


TRAPEZOIDAL [T] 44,70 mm



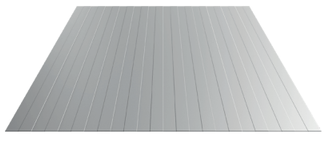


RIB [R] 47,29 mm

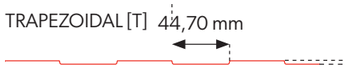


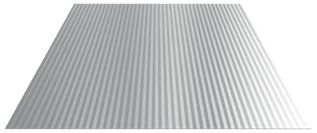
FLAT [F]

Internal profiling

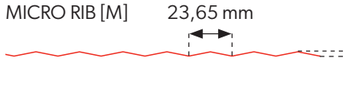


TRAPEZOIDAL [T] 44,70 mm





MICRO RIB [M] 23,65 mm



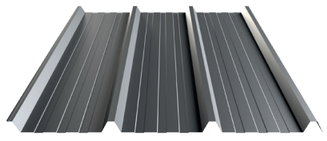
FLAT [F]

ATTENTION! Due to the structure of sandwich panels with FLAT [F] profiles, the so-called effect may occur. „waves" of the sheet metal. This is a natural phenomenon for this type of products. We recommend contacting the technical department to choose the optimal solution.

Internal and external profiling are available in any configuration.

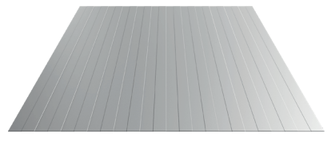
Profiling types of CORE PIR roof sandwich panels

External profiling

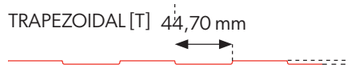


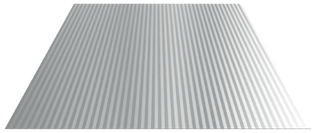
TRAPEZOIDAL 40 [T40]

Internal profiling

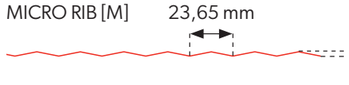


TRAPEZOIDAL [T] 44,70 mm





MICRO RIB [M] 23,65 mm



FLAT [F]

ATTENTION! Due to the structure of sandwich panels with FLAT [F] profiles, the so-called effect may occur. „waves" of the sheet metal. This is a natural phenomenon for this type of products. We recommend contacting the technical department to choose the optimal solution.

Internal and external profiling are available in any configuration.

Coatings and colours

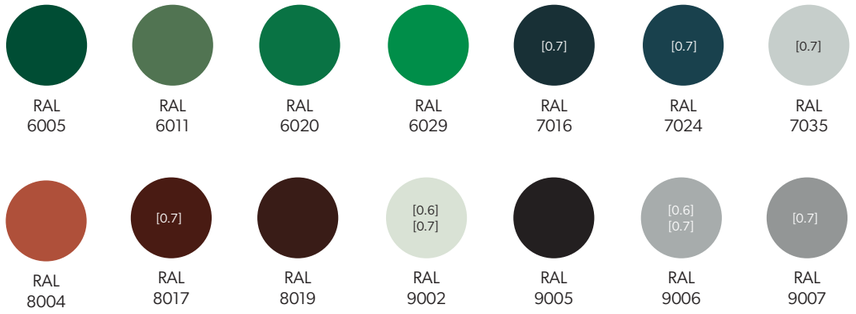
Due to the possibility of different environmental conditions, it becomes very important to correctly choose and apply a suitable coating for the external and internal cladding of sandwich panels. One of the criteria is the EN ISO 12944-2:2001 standard, which defines the corrosivity categories: C1, C2, C3, C4, C5-I and C5-M. The corrosivity category specified in the project is a guideline, which must be followed when choosing the appropriate coating.

POLIESTER Interior [INT] – available colours for interior cladding

INT 9002 | INT 9010

POLIESTER Standard [RAL] – available colours for the external cladding

RAL 1002 | RAL 1015 | RAL 3000 [0.7] | RAL 3005 | RAL 3009 | RAL 3011 [0.7] | RAL 5010 [0.7]



RAL 6005 | RAL 6011 | RAL 6020 | RAL 6029 | RAL 7016 [0.7] | RAL 7024 [0.7] | RAL 7035 [0.7]

RAL 8004 | RAL 8017 [0.7] | RAL 8019 | RAL 9002 [0.6] [0.7] | RAL 9005 | RAL 9006 [0.6] [0.7] | RAL 9007 [0.7] | RAL 9010 [0.7]

HERCULIT [HC]

HC 3009 | HC 7016 | HC 8004 | HC 8017 | HC 9005

The printing technology does not allow the accurate rendering of colours, therefore the colours shown are indicative and may differ from the real ones.

MULTILAYER 40 [MLT] – available colours for the external cladding

SL252 Winchester [0.5]* [0.6] | SL55 Venge [0.6] | SL59 Dark Oak [0.5]* [0.6] | SL65 Golden Oak [0.5]* [0.6]

In addition, upon request, custom colours and coatings are available, outside the presented palette (PVDF, PUR, PVC (P), PVC (F)–FoodSafe.

The following overview is indicative.

Code	Coating thickness	Corrosion resistance	UV resistance
POLIESTER Interior [INT]	15 µm	RA2	not applicable
POLIESTER Standard [RAL]	25 µm	RC3	RUV2
HERCULIT [HC]	35 µm	RC4	RUV4
MULTILAYER 40 [MLT]	40 µm	RC3	RUV3

Coated sheet cross-section

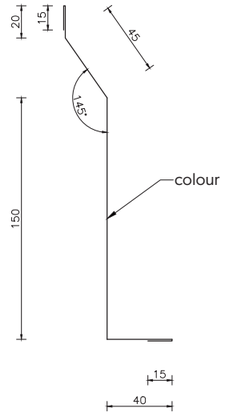
Flashings dedicated for CORE PIR

Table of details

BP2 Sp. z o.o.,
30-527 Kraków
ul. Nadwiślańska 11/139

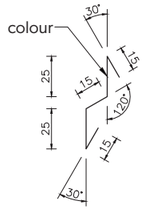
OB1 Flashing B1 masking the connection between sandwich panel and the ground beam



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB1		285	3000		3,36
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH1, DSH2, DSV1, DSV2, DHH1, DHH2, DHV1, DHV2

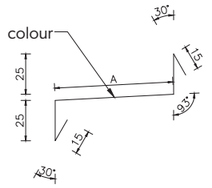
OB2 Runway drip cap



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB2		95	3000		1,12
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH1

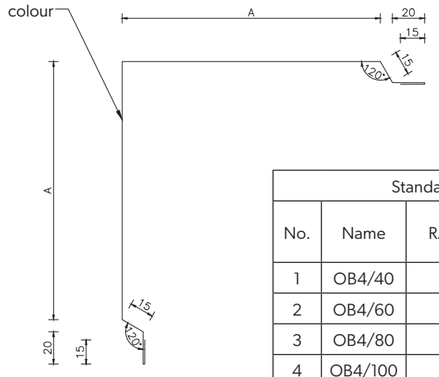
OB3 Runway drip cap



Standard sheet metal work with a thickness 0,5 mm							
No.	Name	RAL	A	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[mm]	[°]	[kg]
1	OB3/40		33	113	3000		1,33
2	OB3/60		53	133	3000		1,57
3	OB3/80		73	153	3000		1,80
4	OB3/100		93	173	3000		2,04
5	OB3/120		113	193	3000		2,27
Non-standard sheet metal work with a thickness of …. mm							

Flashing occurs in the details: DSH2

OB4 Flashing OB4 masking the connection of sandwich panels in the corner



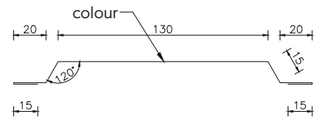
Standard sheet metal work with a thickness 0,5 mm							
No.	Name	RAL	A	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[mm]	[°]	[kg]
1	OB4/40		120	340	3000		4,00
2	OB4/60		140	380	3000		4,47
3	OB4/80		160	420	3000		4,95
4	OB4/100		180	460	3000		5,42
5	OB4/120		200	500	3000		5,89
Non-standard sheet metal work with a thickness of …. mm							

Flashing occurs in the details: DSH3, DSV3, DHH3, DHV3

TECHNICAL CATALOGUE OF CORE PIR SANDWICH PANELS / Flashings

BP2 Sp. z o.o.,
30-527 Kraków
ul. Nadwiślańska 11/139

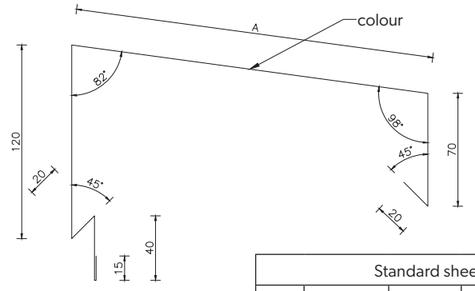
OB5 Flashing OB5 masking the connection of sandwich panels lengthwise



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB5		230	3000		2,71
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH4, DHH4

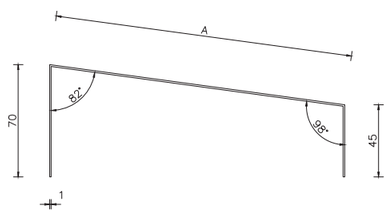
OB6 Flashing OB6 masking the attic finish



Standard sheet metal work with a thickness 0,5 mm							
No.	Name	RAL	A	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[mm]	[°]	[kg]
1	OB6/40		183	468	3000		5,51
2	OB6/60		203	488	3000		5,75
3	OB6/80		223	508	3000		5,98
4	OB6/100		243	528	3000		6,22
5	OB6/120		263	548	3000		6,45
Non-standard sheet metal work with a thickness of …. mm							

Flashing occurs in the details: DSH5, DSV5, DHH5, DHV5

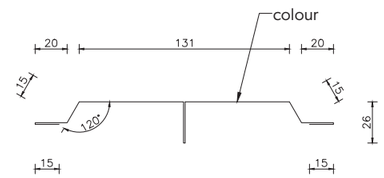
OB7 Flashing bracket OB7 masking the attic finish



Standard sheet metal work with a thickness 0,1 mm							
No.	Name	RAL	A	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[mm]	[°]	[kg]
1	OB7/40		146	261	200		0,20
2	OB7/60		166	281	200		0,22
3	OB7/80		186	301	200		0,24
4	OB7/100		206	321	200		0,25
5	OB7/120		226	341	200		0,27
Non-standard sheet metal work with a thickness of …. mm							

Flashing occurs in the details: DSH5, DSV5, DHH5, DHV5

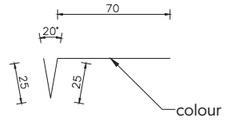
OB8 Flashing OB8 masking the connection of sandwich panels with the wall from outside



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB8		283	3000		3,33
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH6, DSV6, DHH6, DHV6

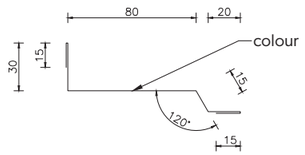
OB9 Flashing OB9 masking the connection of sandwich panels with the wall from inside



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB9		120	3000		1,41
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH6, DSV6, DHH6, DHV6

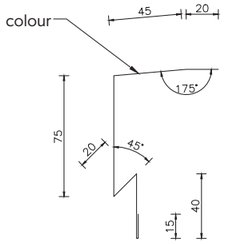
OB10 Flashing OB10 masking the connection of sandwich panels in the inner corner



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB10		175	3000		2,06
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH7, DSV7, DHH7, DHV7

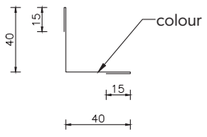
OB11 Horizontal flashing OB11 masking the connection of sandwich panels with the window, window sill



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB11		215	3000		2,53
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH8, DSV8, DHH8, DHV8

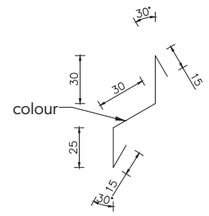
OB12 Flashing OB12 masking the connection of sandwich panels with the window from inside



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB12		110	3000		1,30
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DR9

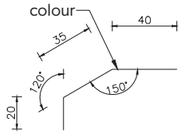
OB13 Flashing OB13, drip cap over-window



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB13		115	3000		1,35
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH8

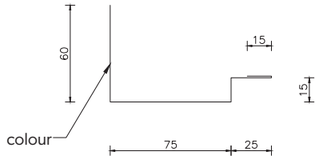
OB14 Flashing OB14, drip cap bottom, over the window



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion	Length	Angle α	Weight
			[mm]	[mm]	[°]	[kg]
1	OB14		95	3000		1,12
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH8

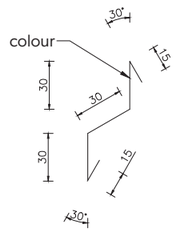
OB15 Vertical flashing OB15 masking the connection of sandwich panels with the window



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion [mm]	Length [mm]	Angle α [°]	Weight [kg]
1	OB15		190	3000		2,24
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH8, DSH9, DSV8, DSV9, DHH8, DHH9, DHV8, DHV9

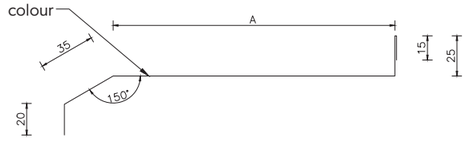
OB16 Horizontal flashing OB16 masking the connection of sandwich panels with the gate



Standard sheet metal work with a thickness 0,5 mm						
No.	Name	RAL	Expansion [mm]	Length [mm]	Angle α [°]	Weight [kg]
1	OB16		120	3000		1,41
Non-standard sheet metal work with a thickness of …. mm						

Flashing occurs in the details: DSH9

OB17 Horizontal flashing OB17 masking the connection of sandwich panels with the bottom gate



Standard sheet metal work with a thickness 0,5 mm							
No.	Name	RAL	A [mm]	Expansion [mm]	Length [mm]	Angle α [°]	Weight [kg]
1	OB17/40		135	230	3000		2,71
