General information

XTREME [XT] is a top-class protective coating from ArcelorMittal that sets a new standard for durability and resistance - also available for products made of low-emission steel XCarb® is a guarantee of durability with reduced environmental impact. With an advanced **70-micron** multi-layer structure, it provides exceptional protection against the harshest weather conditions - from intense UV radiation to extreme corrosive environments.

XTREME [XT] coating is offered in deep black **XT 33**, a shade that blends seamlessly with the modern building aesthetic.

- Superior corrosion resistance (**RC5+**) - ideal for coastal and industrial areas.
- **70 micron** multi-layer protection - reliable shield against sun, rain and extreme conditions.
- **Deep black XT 33** - a timeless colour that matches any modern architectural concept.
- **Unchanging aesthetics** - resistant to colour and gloss degradation, even with prolonged exposure to the sun.
- **60-year** guarantee under standard conditions.
- **40 years** warranty in demanding coastal conditions.

 Printing technology does not allow for faithful colour rendition, so the colours shown are approximate and may differ from actual colours.

 Detailed warranty conditions are specified in the warranty card. The warranty becomes valid after registration on the website **www.vss.sk**.

Technical specifications

COATING PROPERTIES				
Code	Coatings thickness	Corrosion resistance	UV resistance	Warranty period (years)
XTREME [XT]	70 µm	RC5+	RUV5	up to 60
